Here is the Bethpage Water District Spring 2015 Newsletter (see the highlighted section).

Also, Bethpage Water District begins construction of a new Ground Storage Tank 2 MG Ground Storage Tank to be located at Plainview Road site.

Bethpage Water District is proud to announce that construction has commenced on a new 2 million gallon ground storage tank at it's Plainview Road site. This new storage tank will be able to serve the continuing growth of its community and provide additional fire protection throughout the town. This strategic location allows us to utilize areas away from the Grumman Plume contaminants, thereby alleviating operational costs of our filtered facilities.

Hi Carol,

The Bethpage Water District has installed a new public supply wellfield but I believe it isn't yet on line. Mike Boufis had stated it was outside of the influence of the Northrop-Grumman/Navy plumes towards the east. Where exactly is this located and what are the screen depths and pumping capacity? NYSDEC and EPA have several other "sites" towards that area and there should be some coordination so that the initiation of pumping by Bethpage doesn't impact any known plumes.

Rob
